

OUR STORY

My name is Christos Gouletsas, I am a chemical engineer and I am the head of a team of young trained scientists with a passion for research and innovation. In 2010, we founded our company, located in the beautiful countryside of Kilkis, in a green plain beside the Axios River. The location is not accidental as we love nature very much and we have sought to pass this on to our products as well.

When I became a father for the first time, I started to think about issues that until then did not matter to me, such as my child's health and my own health as a parent. My wife and I wanted, what we and our child used to be 100% healthy and safe. From our love for nature and our child, we invented the egreeno products, a pioneering series of pure natural detergents with special extra herbal ingredients, made especially for you.

OUR VALUES

1. We respect nature and the environment. With this, our mindset, our function and our products are perfectly in line. The water, the sun, the air, the earth, give us their resources, and we ought to protect and recycle them back to nature again.

2. We love our children and give them the best. We want them to grow up well and play carelessly in a clean house without harmful chemicals. That is why our products contain ingredients that are internationally recognized as human-friendly and we have excluded substances that pose any health problems.

3. Greece is a blessed country. The biodiversity of the Greek flora offers a plethora of essential oils, vegetable oils and ingredients that have miraculous properties. We just decided to use them.

OUR PHILOSOPHY

Balance prevails in nature. And our cleaners are designed to maintain a balance: effective and hard with dirt, pure and friendly to humans, ecological and natural for the environment. For this purpose, we are researching, reading, testing, analyzing, asking, informing, continually improving....

OUR MISSION

Our mission is simple: to make the world better. Wherever we can and however we can. We believe that we must return back to people the good and the love we receive. This is exactly what Alekos and Nafsika, two Greeks who have built an orphanage from scratch in Tanzania. When I met them, I could not stand unmoved by this work of love. That's why 3% of our net revenue from the sale of the fragrance-free egreeno series, will be offered, with our heart, to the Greek Orphanage in Tanzania "TOM" (www.tom.org.gr)
